

I design products and then build them. Eight years on data-heavy enterprise software, and two products of my own now live and in daily use. **Figma to Next.js, no handoff in between.**

PRODUCTS I DESIGNED AND BUILT

Demãos demaos.pt LIVE · IN DAILY USE	Therapists at a special-needs school record a two-minute voice note after a session. It comes back as structured documentation, and parents see the relevant part the same day. Co-founder & CTO — product, design and engineering. Co-founded with Issa Manuel.
CasoTrack casotrack.com PAID PILOT	Plain-language case updates for EU immigration lawyers. Began as document automation; research with firms showed the real cost was inbox volume, so I rebuilt it around client communication. Founder — research, design, build and outreach through to signed pilot.

EXPERIENCE

Devlooon — Co-founder & Principal Designer - Design and software studio co-founded with Issa Manuel: our own products, plus client work taken from discovery through design, build and launch. - Recent builds include an installable web app with an AI diagnostic assistant for an independent mechanic, a Next.js events-rental site and booking flow, and an antiques marketplace replatformed onto a single-vendor commerce stack. - Work in an AI-native loop throughout — Figma with MCP, Cursor and Claude used as production tooling, not demos.	Portugal · Remote Jan 2026 – Present
Nortal — Senior UX Designer (Contract) - Owened the full Arabic adaptation of the Visit NEOM tourism app — RTL layout, typography and accessibility, with content patterns reworked rather than mirrored. - Creative lead on the NEOM NEV learning platform, from research and concept through to delivery.	Remote Aug 2023 – Aug 2026
Emotion Mobility — Senior UX/UI Designer - Led design of real-time fleet management dashboards — vehicle state, routing and telematics — making dense operational data readable for operators working under time pressure. - Built and scaled the Figma design system the team still builds against.	Portugal · Hybrid Jul 2023 – Mar 2025

MindCompass — Senior UX/UI Designer (Contract)

Portugal · Remote | Jan – Jul 2023

- Designed an AI psychometric testing platform from research to high-fidelity prototype, owning the data visualisation of results for lay readers.

OnePulse — UX/UI Designer

Lisbon, Portugal | Feb 2022 – Feb 2023

- Led the redesign of the core mobile and web survey platforms and owned cross-platform design system documentation.

OutSystems — UI/UX Designer

Lisbon, Portugal | May 2021 – Feb 2022

- Designed workflows and prototypes for the enterprise low-code platform — a deeply technical product whose users are developers — and contributed to its design system.

Samsung SIDIA — Product Designer

Manaus, Brazil | Nov 2018 – Jul 2021

- Lead designer for the Automation Team, rebuilding the legacy software used to test Samsung devices, embedded inside the engineering team.

2014 – 2021 — freelance UI/UX design via Upwork, alongside Devloon's first incarnation and DroitLab Ltd. End-to-end design across SaaS, healthcare and consumer products.

SKILLS

DESIGN	Figma · design systems · interaction and visual design · research and usability testing
BUILD	Next.js · React · Tailwind · Supabase · Vercel · Framer
AI	Cursor · Claude Code · Figma MCP. Designing for probabilistic output — failure states, confidence and correction paths
DOMAINS	Fleet telematics · legal tech · healthcare and special education · internal tooling · low-code · e-commerce

EDUCATION & LANGUAGES

EDUCATION	B.Sc. Textile Engineering — University of Dhaka, Bangladesh · 2011–2014
LANGUAGES	Bengali (native) · English (advanced) · Portuguese (conversational) · Arabic (fluent written, basic spoken)
